

## **Brain Function and Brain Structure of Human Memory**

**Category**

Memory

**Enrollment Closing Date**

Sep 30, 2020

**Description**

We are looking for Veterans with or without memory problems to participate in memory research. The experiment will be conducted in a Magnetic Resonance Imaging (MRI) scanner on the UCSD campus in La Jolla. While in the scanner you will take computer-administered tests of memory and cognition where you will be asked to remember facts or short sentences. You will also be asked to take computer-administered tests outside of the scanner.

**Requirements**

Veterans 65 or older without memory problems or with a diagnosis of Mild Memory Impairment who are willing and able to complete behavioral tests and MRI scans.

**Benefits**

Individuals who qualify and complete the study will be compensated up to \$290 for their participation and receive a picture of their brain. We will gain scientifically and clinically relevant information from the study results.
