

VA Merit Grant Study

Category

Diabetes

Enrollment Closing Date

May 31, 2017

Description

Robert R. Henry, MD and his associates are conducting a research study to find out more about the effects of obesity and diabetes on the storage and use of sugar and fat in human muscle cells grown in the laboratory.

Requirements

You may qualify if you are between the ages of 35 and 70, obese with a body mass index (BMI) greater than 30 and do not have diabetes, or obese with a BMI greater than 30 and have Type 2 Diabetes, or you have Type 2 Diabetes.

Benefits

There will not be a direct benefit to you from these procedures. The investigators, however, may learn more about how to treat or prevent obesity and Type 2 diabetes.
